

QWQER Prestashop Module

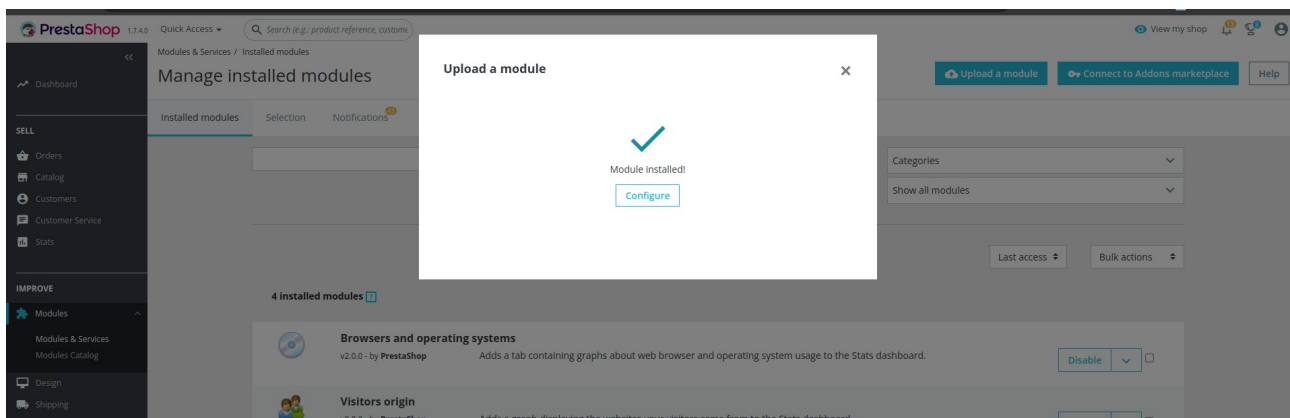

- Installing QWQER Module
- Configuring QWQER Module
- Using QWQER Module
- Uninstalling QWQER Module

Installing QWQER Module

For installing QWQER Module you need go to Admin → Improve → Modules → Modules & Services and click on Upload a Module button(in top right corner):

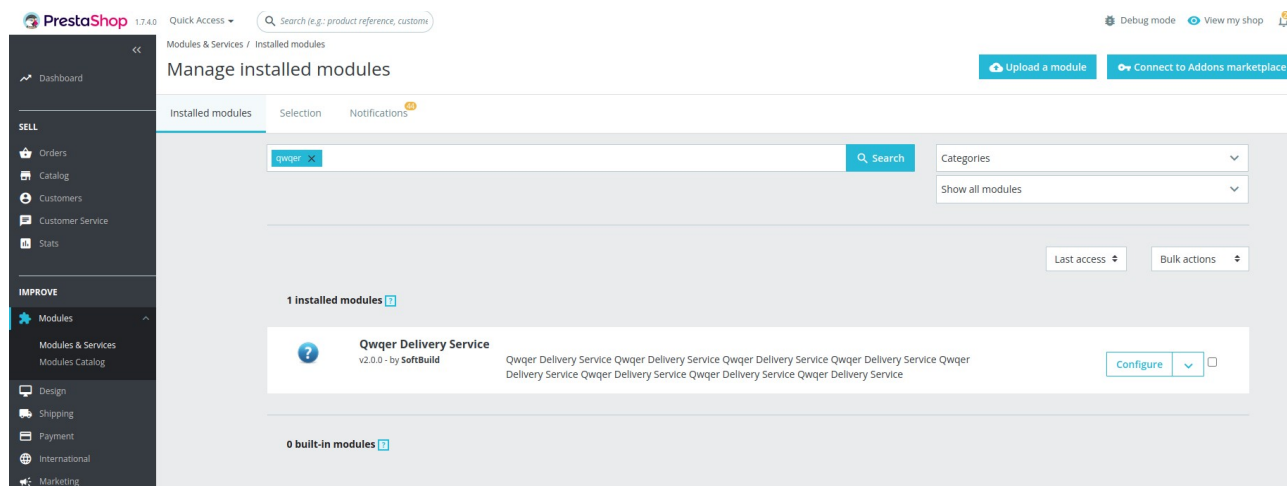

after that you will see Upload a module pop up. Just select local stored zip file of QWQER module in the pop up and in few seconds you will see the message:

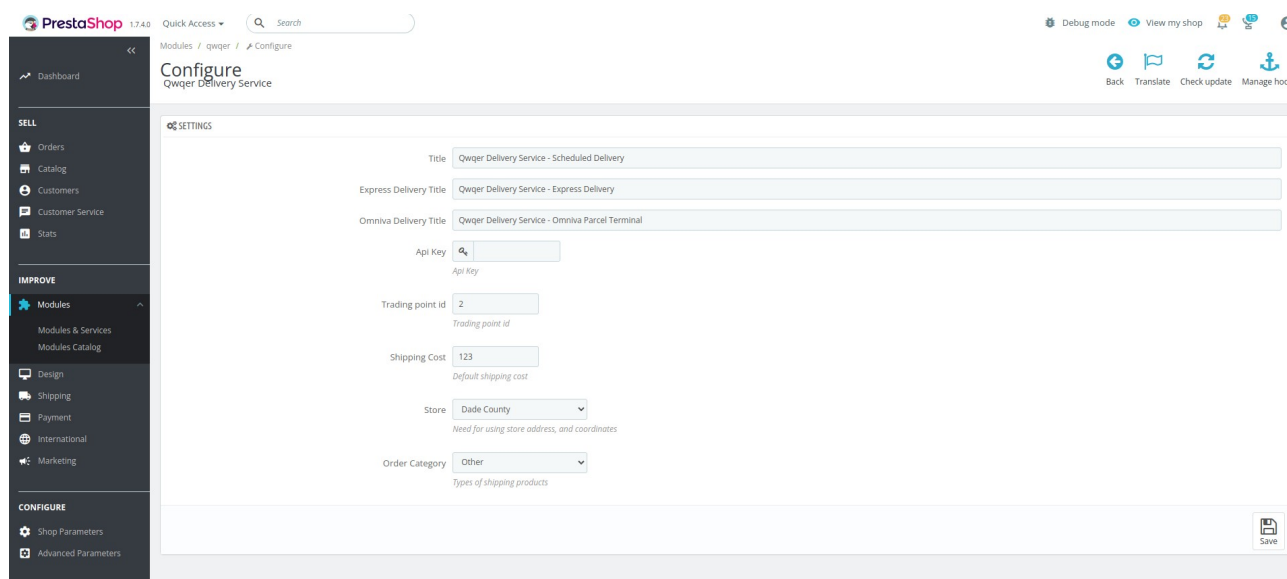

It means that QWQER module was be installed successfully.

Configuring QWQER Module

Configuring QWQER Module is simple. Need to go to Admin → Improve → Modules find in search field module by name:

Click on Configure button and fill fields:

- **Title** – name of Scheduled Delivery method.
- **Express Delivery Title** - name of Express Delivery.
- **Omniva Delivery Title** – name of Omniva Parcel Terminal.
- **Api Key** – it's more important. Save api key from delivery account settings.
- **Trading point id** – by default it's 2(not change).
- **Shipping Cost** – the amount will be using if delivery service will not return payment for an shipping address.
- **Store** – Select store with filled physically address, it's needed for correct work with delivery service.
- **Order Category** – type of shipping products.
